

# INVENTORY MANAGEMENT

## BRING VISIBILITY TO YOUR INVENTORY

Quality inventory management is an important aspect to maintaining situational awareness during events. TRACK inventory that is issued, turned-in, and consumed during incidents and events with Salamander's interoperable **INVENTORY APP**. Assure that your equipment is properly maintained and reported on from within the **INVENTORY MANAGEMENT** equipment database through SalamanderLive™.

## FEATURES

### INVENTORY MANAGEMENT:

#### Equipment Import

Upload all equipment fields (with the exception of qualifications and pictures).

#### Reporting

INVENTORY MANAGEMENT reports provide visibility to where your inventory is located, alert statuses and maintenance, a full history, and more. Through SalamanderLive, export your reports in .CSV format to get full awareness of all imported assets.

#### Equipment Alerts

Set equipment reminder alerts to complete tasks. Have specific employees subscribe to receive alerts. Mark alerts as completed to log task completion and review any outstanding / overdue alerts in the dashboard.

#### Inventory Hardware Kit

Mobile Printer, Labels, Ribbon

#### Required Software

SalamanderLive

### INVENTORY APP:

#### Issue Mode

From an iOS or Android mobile device, the app user can scan a Salamander personnel TAG and then scan one-to-many equipment TAGs to assign equipment to that personnel. The fixed assets will decrement in SalamanderLive as they are assigned to show they are active in the field.

#### Turn-In Mode

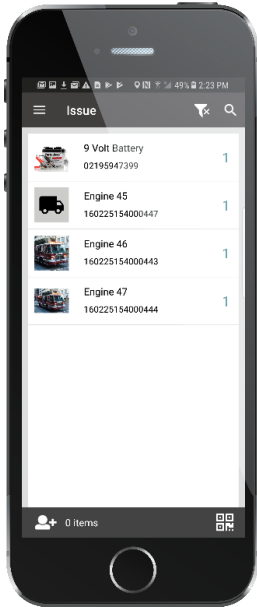

Equipment can be returned to your inventory by scanning the equipment TAG. When equipment is turned in, the quantity on-hand is incremented and reflected in SalamanderLive.

#### Physical Inventory Management

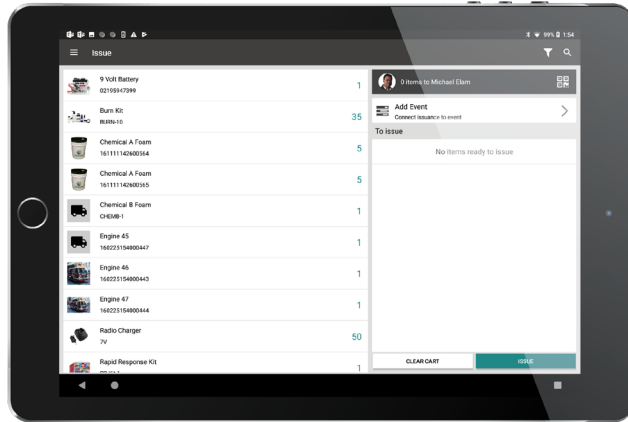

Manage inventory anywhere, anytime.

- In Atlanta and Greater Georgia contact Gene Hawkins, 407-330-9190
- In South Carolina, Columbia, Savannah and Augusta contact Joanna Weitzel, 803-542-0316
